## **DETAILED ACTION**

### ***Response to Amendment***

This Office Action is response to Applicant's arguments and request for reconsideration of application 10/707,301 filed on 15 June 2010.

### ***Status of the Claims***

Claims 1-23 and 26-49 are original. Claim 25 is currently amended. Claim 24 is cancelled. Thus, claims 1-23 and 25-49 are currently pending.

### ***Allowable Subject Matter***

Claims 1-23 and 25-49 are allowed subject to the examiners amendment described below.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Marisa J. Dubuc, Reg. No. 77212 on Monday, August 30, 2010.

## **EXAMINER'S AMENDMENT**

The application has been amended as follows: Please amend claim 25.

25. (Currently amended) A nontransitory storage medium including machine-readable computer program code for providing deep linking with digital rights management, comprising:

identifying a hypertext link on a source web page on a source server as a deep link, said hypertext link referencing a target web page on a target web site of a target server, the source server in communication with the target server via a network;

upon selecting said deep link, accessing a deep link table associated with said deep link;

wherein said deep link table contains web page links and rules operable for establishing web content that is to be presented to a visitor of said target web site; and

Art Unit: 3688

displaying web content to said visitor in accordance with said rules, the web content comprising:

pre-display content that is displayed prior to display of said target web page; and

with-display content that is displayed simultaneously with display of said target web page.

### ***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance: Please refer to the prosecution history of the instant application. In particular, the applicant's remarks, as noted below which distinguish the instant claimed invention from the closest prior art reference listed below.

Rabindranath Dutta, Restricting Deep Hyperlinking on the World Wide Web US Patent 6,539,424 B1.

Dutta describes hyperlinking on the World Wide Web, and more specifically to a system, method and program for restricting deep hyperlinking into Web sites of other content producers by rerouting a deep hyperlink to the home page of the Web site along with directions for the sequence of links to get to the deep link from the home page. Further, Dutta discloses a system, method and program of the invention enables a content provider to maintain control over the way in which a user may view the content provider's information. In a preferred embodiment, cookies are sent by the Web server to the client. The cookies keep track of the originally requested deep hyperlinked page, and the path being followed by a user through the various pages from the home page to reach the desired page.

The claimed invention discloses a method, system, and storage medium for providing deep linking activities with digital rights management. A deep link refers to a hyperlink located on a web page or search engine query that, when selected by a user, transfers the user to another web page of a web site that is different than the web site's home page or "first page". It also includes identifying a hypertext link on a source web page as a deep link and, upon selecting the deep link, accessing a deep link table associated with the deep link. The hypertext link refers to a target web page on a target web site. The

Art Unit: 3688

hypertext link refers to a target web page on a target web site. The deep link table contains web page links and rules for establishing web content that is to be presented to a visitor of the target web site.

Claim 1 is allowed because the best prior art of record, Dutta, alone or in combination, fails to teach or suggest or otherwise make obvious, all the limitations a computer implemented method for providing deep linking with digital rights management, comprising:

wherein said deep link table contains web page links and rules operable for establishing web content that is to be presented to a visitor of said target web site; and

displaying web content to said visitor in accordance with said rules, the web content comprising:

pre-display content that is displayed prior to display of said target web page;

and with-display content that is displayed simultaneously with display of said target web page.

Independent claims 25 and 47 are allowable based on a similar rationale. Dependent claims 2-23 26-46 and 48-49 are allowable based on the same rationale as the claims from which they depend.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
